

# MR.SNOW®

TEXTILE DRY SLOPE

Wintersports **guaranteed.**

# Textile Snow

## What is this?

Snow that never melts again. Snow that can also be driven on in summer and that saves electricity and water at the same time.

To become independent of climate and weather conditions, MR.SNOW has developed innovative sliding mats. The patented structure makes it possible to glide, to carve and thus ride just like on snow.

Textile snow is supplied on rolls and can be laid on meadows, sports fields and in halls for short periods as well as permanently. Due to the modular construction, installations of any length and width can be built.

Textile snow = just roll it out and go.

## For applications in active snow sports.

### ALPINE

Textile dry slopes ensure operation on the ski slope.

- Ski school
- Ski slope
- Lift track
- Lift entrance
- Lift access
- Jib-Park

### TUBING

Textile toboggan slopes bring fun for young and old.

- Short toboggan run
- Long toboggan run
- Curved toboggan run
- Sledding area
- Accessories

### NORDIC

Textile snow offers new training options in sports.

- Cross-country skiing
- Biathlon
- Ski jumping
- Training facilities

# 365 days of winter sports fun.

Textile dry slopes from **MR.SNOW®** guarantee year-round winter sports fun. Whether skiing, tobogganing or cross-country skiing - the new high-tech gliding mats as a substitute or supplement to the snow convince with excellent driving characteristics and easy handling. On the mat, ready, go!

## Convincing arguments

- All products are designed for use regardless of the weather. This means that the function is guaranteed even at significantly higher temperatures.
- The material development is carried out in cooperation with the Chemnitz University of Technology and other scientific institutions and laboratories.
- The patented material structure ensures huge riding fun, the long durability and an ecologically sustainable product.
- The large modules can be set up and dismantled easily and as often as you like, and they are also easy to store.
- The modular design enables durable and equally flexible use on almost any surface.
- Relatively low investment and operating costs with 100% fun guarantee.

*»The Textile ski slope offers a nice alternative during periods of low snowfall when snowmaking is not possible yet. It is advantageous for a ski school to be able to teach unaffected by any weather conditions.«*

Brigitte Bruchhäuser, owner of DSV ski school Upland/Willingen, Germany

## Your ideas are our world.

Find exciting products with which you can design great worlds for your guests and create added value. The flexible plastic mats help save energy and water and avoid long journeys.

## Ski slope? Toboggan run? Cross-country ski track?

Every single attraction enables a safe and plannable offer 365 days a year. Whether summer toboggan run, winter cross-country ski trail or all-year ski slope. With our snow alternative, you are on the safe side.

At the same time, the textile sliding mats and all frame products stand for ecological value. In addition to minimising your resources, the absence of silicone-based glide agents, the use of recycled raw materials and the use of filter materials help to keep nature and the ground clean in the long term.

Choose your solution. We will be happy to advise you.

# Let yourself be inspired.

Choose from our three product categories and design your individual and variable solution. Textile snow is a robust high-tech textile with particularly good gliding properties on which winter sports work all year round.

## Product worlds

From our experience we recommend the following applications:

### ALPINE

- Ski school
- Ski slope
- Lift track
- Lift entrance
- Lift access
- Jib-Park

### TUBING

- Short toboggan run
- Long toboggan run
- Curved toboggan run
- Sledding area
- Accessories

### NORDIC

- Cross-country skiing
- Biathlon
- Ski jumping
- Training facilities

## Complementable by various accessories and event tools:

- |             |                  |                  |
|-------------|------------------|------------------|
| • Bands     | • Tubes          | • Rope lifts     |
| • Curves    | • Sledges        | • Conveyor belts |
| • Waves     | • Ice sticks     | • Fun modules    |
| • Platforms | • Toboggan ramps | • Landing bags   |

*»Since we have the Textile dry slope, we give a ski course guarantee. We do not need snow anymore.«*

Steffen Schulze, owner of Intersport ski school Schöneck, Germany

# ALPINE

Driving as if on snow. But not just when the snow is here, but every day you want it. Increase your operational safety to 365 days a year.

## Lift access

**Setting and access zone without snow  
with EVO SLOW**

## Lift track

**T-bar track, entrance/exit chairlift  
with EVO EXTREM**

## Ski school

**Beginner ski slopes  
with EVO SPORT** + access, lift, figures

## Ski slope

**Blue and red ski slopes  
with EVO SPORT+** + access, lift, fences

# EXAMPLES

# TUBING

Whether it's a short slope for the little ones, a long race track for the family or a bobsleigh run - tobogganing offers many possibilities. There are now no limits to your imagination.

## Short toboggan run

**Children's toboggan run up to 50 m  
with EVO FLAT + basic accessories**

## Long toboggan run

**Family race courses > 50 m  
with EVO EXTREM + fun elements**

## Curved toboggan run

**For long steep slopes with curves  
with EVO EXTREM + curves**

## Sledding area

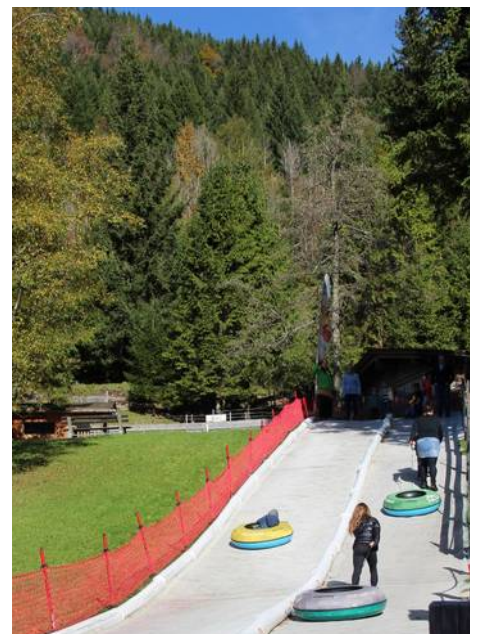

**For fun across the board  
with EVO FLAT**

# EXAMPLES

# NORDIC

When it comes to professional sport, there is no way around skiing. With a 365-day training centre, considerations of travel costs and rentals will be a thing of the past.

## XC classic

**For classic cross-country skiing technique  
with EVO LOIPE**

## XC skating

**For free cross-country skiing technique  
with EVO SPORT+**

## Ski jumping

**For ski jumps up to K90  
with TexSnow *powered by ALPINA***

## Training facilities

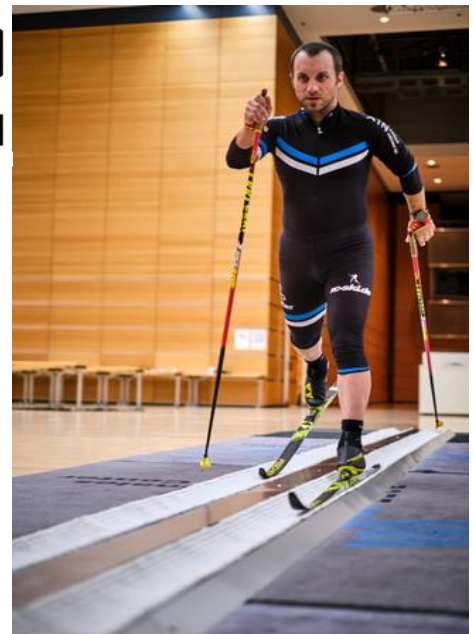

**For play, fun & targeted training  
with EVO LOIPE, SPORT & TexSnow**

# EXAMPLES

# PRODUCT DETAILS

## EVO SLOW

### Liftaccess • Slow setting range

#### Benefit:

The entry-level model. Robust and durable, it can be used for several seasons. Although somewhat slower, the ski glides safely over the surface. Both walking over it with shoes and skiing on it are possible.

#### Facts per module:

Length: 10 m  
Width: 2 m  
Weight: from 15 kg  
Roll diameter:  $\varnothing = 0.3$  m  
Colour: on arrangement

## EVO EXTREM

### Lift entrance • Lift exit • T-bar track

#### Benefit:

Here it's uphill. To focus snow production on the slope, these mats offer quiet gliding in the T-bar track. For the high-traffic entry zone, they offer uncompromising durability.

#### Facts per module:

Length: 20 m  
Width: 1 m/2 m  
Weight: from 25 kg  
Roll diameter:  $\varnothing = 0.5$  m  
Colour: on arrangement

## EVO SPORT

### Practice slope • Ski school • Blue piste

#### Benefit:

The first turn succeeds on this "snow". Our latest Textile snow offers edge grip for all easy skiing techniques and an experience like in real snow. The ski slope is 100% safe and open at all times.

#### Facts per module:

Length: 10 m/20 m  
Width: 2 m  
Weight: from 30 kg  
Roll diameter:  $\varnothing = 0.7$  m  
Colour: on arrangement

## EVO SPORT+

### Freestyle • XC Skating • Red piste

#### Benefit:

Maximum performance for maximum sport. The further development of the EVO family for more fun on steep slopes and more grip for fast training runs. For skiing, snowboarding and free cross-country skiing.

#### Facts per module:

Length: 10 m/20 m  
Width: 2 m  
Weight: from 35 kg  
Roll diameter:  $\varnothing = 0.7$  m  
Colour: on arrangement

## EVO LOIPE

### Classic cross-country skiing

#### Benefit:

With integrated track for the best impression and ideal gliding behaviour. In combination with EVO SPORT+, the training base is perfect. Tested by top athletes and top trainers. Can be used 365 days a year.

#### Facts per module:

Length: 10 m/20 m  
Width: 0.3 m/1 m  
Weight: from 30 kg  
Roll diameter:  $\varnothing = 0.7$  m  
Colour: on arrangement

## EVO FLAT | EVO EXTREM

### Tobogganing • Tubing • Sliding

#### Benefit:

Our best mat for all types of sliding. Whether wide toboggan slope, guided tubing run or ramp at the Christmas market. Flat and safe, this super surface offers child (& parent) friendly giant fun!

#### Facts per module:

Length: 10 m/20 m  
Width: 2 m  
Weight: from 20 kg  
Roll diameter:  $\varnothing = 0.3$  m  
Colour: on arrangement

## HYBRID STRAIGHT

### Guided toboggan run

#### Benefit:

Complete solution for safe tubing. Bands on the left and right, EVO EXTREM in between. With these modules you can build the longest toboggan run in the world or simply a small race track in front of the house.

#### Facts per module:

Length: 20 m  
Width: 2 m  
Weight: from 6 kg/m  
Specials: stackable  
Bands: functional wood

## HYBRID CURVE

### Curved module for toboggan run

#### Benefit:

Perfect extension to your tubing track. For individual, fast and yet safe curves. Thanks to flexible combination, safe tracks can be realised on almost all slopes.

#### Facts per module:

Length: 1 m  
inclusive: EVO EXTREM  
Weight: from 15 kg/m  
Specials: stackable  
Bands: functional wood
